

## The Advanced Trauma Operative Management (ATOM®)

ATOM course is an effective method of increasing surgical competence and confidence in the operative management of penetrating injuries to the chest and abdomen.

### Program Overview

#### Objectives

- The student will explain and describe the proper operative technique for dealing with trauma injury.
- The student must identify traumatic injuries and develop a management plan in order to surgically repair the injuries.
- At the completion of the course, the student will be able to demonstrate the following:

- Increased self-efficacy in the management of traumatic injuries
- Increased knowledge in the management of penetrating injuries
- Ability to successfully and safely perform all operative procedures presented in the course

### **Target Audience**

The intended audience includes senior surgical residents, trauma fellows, military surgeons, and fully trained general surgeons who are not frequently called on to treat penetrating injuries.

### **Accreditation**

The American College of Surgeons is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

### **CME Credit**

The American College of Surgeons designates this live activity for a maximum of 7.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Course duration: 2 days**

❖ **Fees: 8000 LE**
